Engineered Fasteners for Any Challenge

PADMAVATIHardware.COM

Welcome To

Padmavati Hardware Mart

At Padmavati Hardware Mart, we pride ourselves on being a leading supplier of engineered fasteners tailored to meet the needs of various industries. Specializing in mild steel, stainless steel, imported high tensile, hot dip galvanized, and special alloy fasteners, we are committed to delivering products that stand the test of time.

OUR EXPERTISE

With an extensive range of fasteners, we cater primarily to OEMs ensuring that they have access to high-quality materials for their construction and manufacturing projects. Our high tensile steel fasteners, known for their exceptional strength and durability, are essential for critical applications in energy and infra projects and auto manufacturing.

WHY CHOOSE US?

Diverse Product Range: From bolts and nuts to screws and washers, our catalog is designed to
✔ cover all your fastening needs.

Quality Assurance: Our fasteners undergo rigorous testing to ensure they meet or exceed industry
✔ standards.

Custom Solutions: We understand that every project is unique, and we offer tailored solutions to
✔ meet specific requirements.

OUR COMMITMENT TO QUALITY

Utilizing advanced manufacturing techniques and adhering to strict quality control protocols, our products are guaranteed to meet international standards. With certifications in ISO 9001, ISO/TS 16949, and ISO 14001, we ensure that our clients receive nothing but the best.

Product Categories

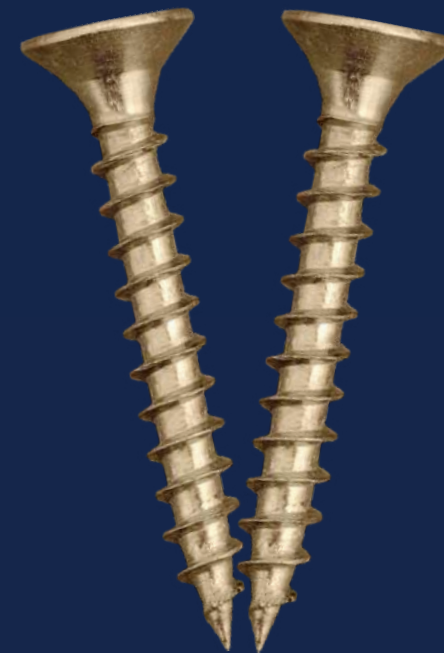

At Padmavati Hardware Mart, we offer a wide range of fasteners to suit various applications. Our products are meticulously designed and manufactured to provide optimal performance and reliability. Explore our product categories below:

HOT DIP GALVANIZED FASTENERS

Hot-dip galvanizing (HDG) is one of the **oldest** and most commonly used method of **protecting steel fasteners from corrosion**. HDG coating is relatively **maintenance free** and provides **excellent corrosion protection** to steel structures for 15–20 years in most atmospheric environments, (industrial, urban, marine & rural).

HDG Provides Two Types Of Corrosion Protection: **BARRIER & GALVANIC (CATHODIC)**

It protects steel by acting as a semi-impermeable barrier to the environmental elements that causes corrosion.

Hot-dip galvanizing process starts with carefully cleaning the fastener surface and remove organic contaminants like dirt, grease or oil.

Scale and rust are removed by pickling it in a dilute solution of heated sulfuric acid or an ambient temperature hydrochloric acid solution. The fasteners then go through another clean water rinse.

The final phase of the process is inspection.

Our production facilities are **ISO 9001, ISO/TS 16949, ISO 14001, and BS OHSAS 18001 certified.**

At our place we take a number of precautions to make sure our fasteners meet or exceed governing specifications. Further, full traceability to the original manufacturing lot number is available.

OUR RANGE OF COMMERCIAL & PRECISION FASTENERS		
DIAMETER	LENGTH (MM)	
	Cold Forged	Hot Forged
M04	6 to 40	---
M05	8 to 75	---
M06	8 to 100	---
M08	10 to 100	---
M10	15 to 300	25 to 300
